

THE LEGENDS FACILITATOR'S TOOLKIT

2. Digital Literacy for Older Adults Resources for Facilitators

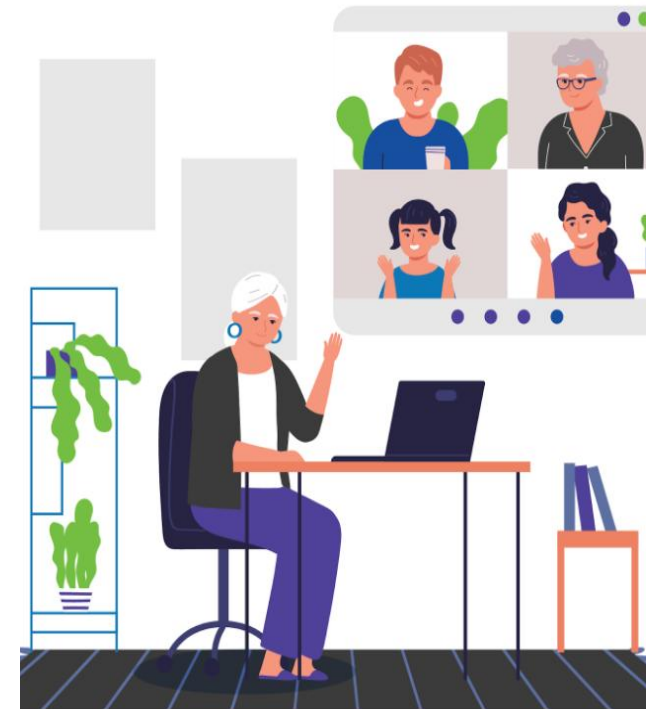

Co-funded by
the European Union

Funded by the European Union. However, the opinions expressed are those of the author(s) alone and do not necessarily reflect the views of the European Union or the Erasmus+ National Agency (INDIRE). Neither the European Union nor the granting authority can be held responsible for them.
Project Number: 2025-1-IT02-KA220-ADU-000352101

How to use this Resource

This guidebook is a practical companion to the **Digital Literacy for Older Adults** module. It gives the facilitator everything they need to understand and teach during the activities.

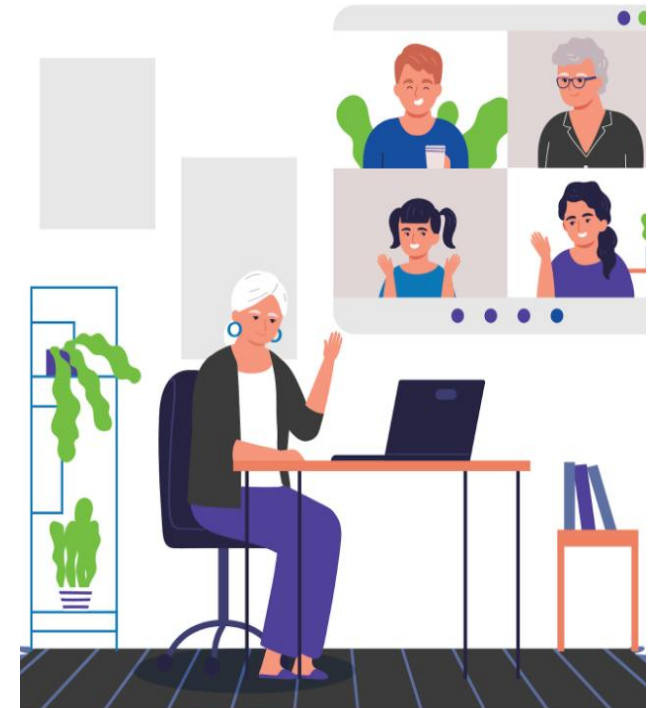

- Facilitators do not need to be technology experts to use this guide.
- Each section is written in plain language and structured so you can find what you need quickly.
- Some of these resources are also directed at seniors directly.

DigitalLearn.org – Trainers Toolkit

What is DigitalLearn's Trainer Toolkit?

A free, browser-based library of ready-made workshop kits built by the US Public Library Association **specifically for non-professional trainers**. Unlike the public-facing DigitalLearn site, which is for self-paced learner courses, this is a separate creation and preparation tool for the person running the sessions. The Toolkit covers step-by-step guides across a wide range of topics: video conferencing, Word, Windows, PC hardware... For each topic, you get a full bundle rather than a single document: an instructor's guide, a slide deck, printable handouts, and practice files, turning a basic lesson outline into a structured, ready-to-teach class

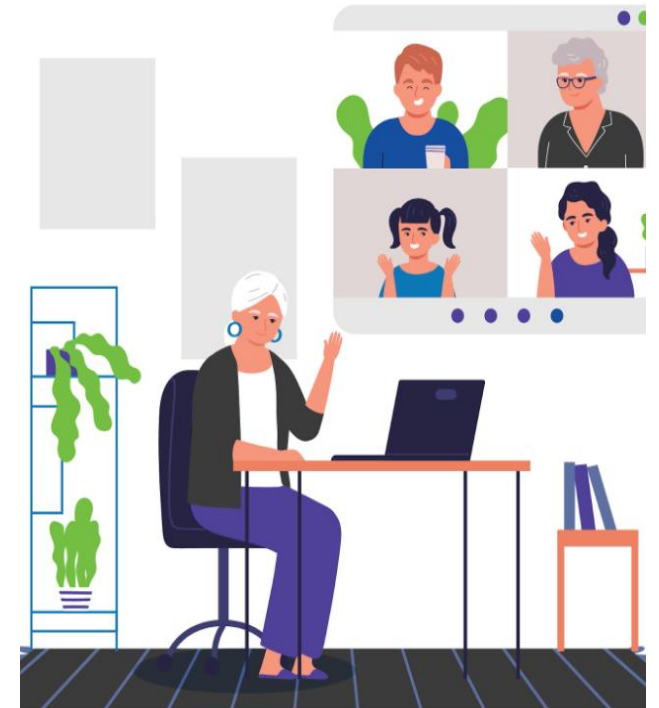

Webjunction – Digital literacy for older adults course

What is Webjunction's course?

Originally imagined for public libraries, this **free online webinar** allows you to learn how to best accompany older adults when teaching them about digital literacy.

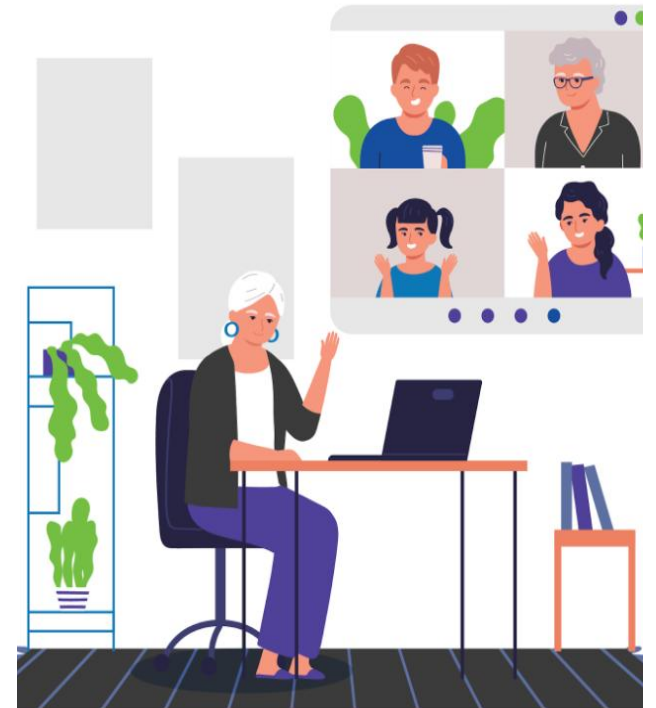

It includes examples of successful programming, as well as tips for working with older adults – and best practices from implementing the program in local libraries. You will also learn about **TechBoomers**, a free website that offers technology training tutorials developed specifically for older adults.

What is Cyber-Seniors?

Cyber-Seniors is a US platform providing **online courses and step-by-step guides for seniors on digital literacy**. The platform mainly focus on three aspects: navigating Android devices, navigating Apple devices, and cybersecurity. Within the cybersecurity theme, a wide range of sub-topics are covered: recognizing malware, fake news, using an online banking platform safely...

This resource is a great tool for trainers who wish to answer seniors' concerns further, covering topics that are not included in LEGENDS' Module 2.

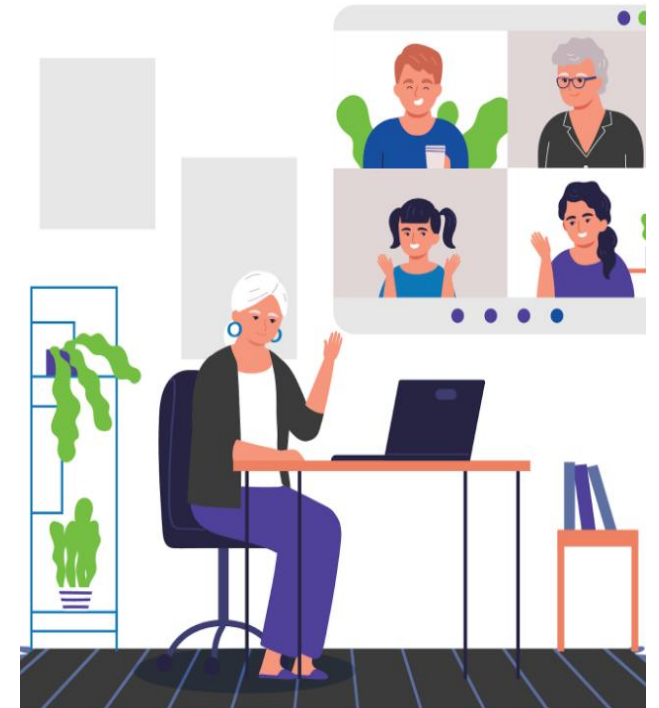

Skills to connect – Online course & Toolkit

What is Skills to connect?

Skills to connect is a completed **Erasmus+ project** – just like LEGENDS – focusing on bridging the digital literacy gap for seniors and trainers. Their toolkit and online course focus on a wide range of topics, from basic device management skills to managing online administration platforms. While their online courses focus on learning skills long-term, the toolkit collects downloadable step-by-step guides.

This resource is great for trainers and seniors who wish to **know more about the overall impact of digital devices and the internet**, including on the following topics: digital technology and health, taking part in civic life online, the impact of digital technology on the environment.

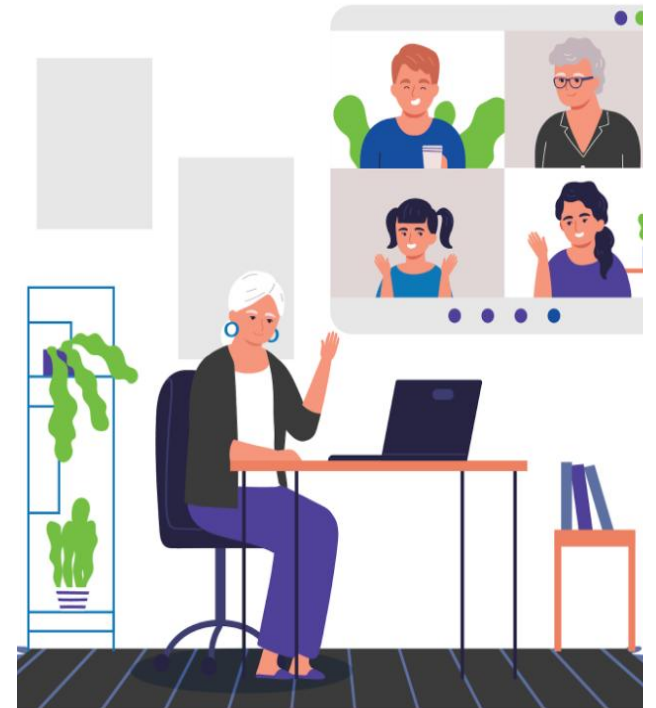

BOOMER – Booming digital literacy skills among elderly population

What is BOOMER?

BOOMER is also a completed Erasmus+ project, which focuses on helping elderly develop digital literacy skills across four main areas: communication and collaboration, information literacy, problem solving, and safety.

This is a great resource for trainers and seniors who wish to know more about **managing online platforms, such as administration, finance, and health management**. It also includes a complete glossary of digital terms for both target groups.

Thank you very much
for your attention!
